The quality of our cartridges is just what you would expect from an upscale cachè brand like Sharper Image®. Enjoy vivid, crisp images, longer cartridge life and quality that exceeds other manufacturer's standards.

The re-manufacturing process consists of eight steps: Our state-of-the art process includes proprietary digital filling and sealing techniques using custom-built robotic equipment - ensuring each cartridge meets or exceeds OEM standards.

Furthermore, empty cartridges are carefully disassembled and cleaned with our unique patented process. Using precise automated techniques and premium toner, we then digitally fill the cartridges to the exact fill weights. Each cartridge is then robotically sealed and our highly trained technicians assemble them with OEM grade compatible components. We perform 100% post testing every single cartridge before it leaves our facilities.
